SUBJECT INDEX

A

ABSORPTION
activities, 1957-8, towers and mass transfer 90
gases in laminar liquid jets 347
heat liberation of gases, thermodynamics 210
resistance, carbon dioxide in water 130

ABSORPTION COOLING
Bryant ammonia cycle 373
dehydration and degassing, separate stations 404
Refrigerant 22, advantages 400

ACETYLENE
cis and *trans*, electronic energy levels 173
hot waste gases for turbine-generated power 43
hydrocarbon-oxygen mixer-burner 227
low concentrations in air 22
partial combustion, high speed pyrolysis 398
perchloric acid titration method 87
PVT properties 383
quenching of preignition 13
reaction with active nitrogen 130
recovery, by multistage solvent process 76
recovery, design for specified purity 112
recovery, pressure scrubbing with methanol 298
removal method, selection 194
solvent recovery, from ethylene 398

Production
incomplete combustion of methane with oxygen 115
light liquid hydrocarbons, U.S. interest 224
oxidation pyrolysis of methane 368

ADSORPTION. See also Carbon Black; Catalysts; Chemisorption
alumino silicates, for purifying argon 262
chromatographic retention volume vs physical apparent volume 309
evaluation of system for payout 218
flow, in micropores 409
helium, first layer, 4.2°K 130
hydrogen on nickel, diffraction patterns 90
krypton, methane, ethane on metal films 383
methane and ethane on metal films 24
modified carbons, for N_2 and A 276
molecular sieves in refining 277
monofunctional organic molecules on nickel 383
oxygen on nickel, effect of defect density 90
process review, 1957-8, on separations, chromatography, liquid studies 90
rare gases, measurement on surfaces 348
rare gas on mica, isotherms and surface area 24
rare gases on mica, thermodynamics 24
relation to catalysis 173
water on silica gel, bound and adsorbed 90
three types, hydrogen on iron catalysts 173
vapors in porous media, selectivity and azeotropes 211

AIR. See also Liquefaction
properties, —150° to 250° F, 0 to 1200 psi 348

AIR CONDITIONING. See also Heat Pump
closed space ionization of air 201
control systems, transistor basis 48
counterflow cooling tower performance 339
domestic units, sales recovery 215
environment, in manned earth satellite 338
equipment, capacity ratings 48
evaporative air cooling systems 300
free-piston compressor development 373
gas-fueled dehumidifier for machinery storage 77
industrial, cost estimation 265
ionization of air, influence 201
noise-free penthouse installation 265
odor problem and psychology 48
odorization control 299
radiant heat control 374
solar energy for space cooling 161
specifications, gas-powered systems 48

AIR POLLUTION. See also Dust; individual contaminant compounds
abatement in chemical industries 117
analysis, 1957-8, reviews 127
auto exhaust, composition and photolysis 78
automobile fuel losses, reduction by simple changes 229
catalyst to induce nitrogen oxide reduction 339
catalytic combustion of vapors 302
catalytic oxidation of process air 161
Clean Air Act, England, application 374
combustion pollutants, control programs 15
company policy on potential problems 141
control, British gasworks 400
control by analysis 77
control, Manchester, England 339
deterioration of materials 15
dust and fume scrubbing unit 48
dust and gas removal, methods 48
dust determination equipment 265
elimination, by new afterburner 374
engine factors in nitrogen oxide formation 15
eye irritation and nitrogen dioxide in auto exhaust vs irradiation 78
flourides, prevention in sinter gases 265
Foundation research, 1958 117
hydrogen sulfide, control and monitoring 401
incinerators, effect of firing practice 78
index correlation with mortality 202
lead removal from exhaust catalyst 82
legal controls, for oil-burning equipment 202
odor counteractants, stack gases 202
particles, size distribution and concentration 401
petroleum industry, problems 374
prevention, aerosol agglomeration and filtration 265
prevention, cat cracker waste gas 161
prevention, Kaiser's Fontana (Calif.) plant 400
prevention, Milan, Italy 118
reduction, by incineration of scrap metal 162
relation to fatality factors 202
smog oxidant formation, kinetics 374
sulfur and nitrogen pollutants, Los Angeles 48

AMERICAN GAS ASSOCIATION
history, organization and functions 315

AMMONIA
condensed, solubility for $CH_4+N_2+H_2$ 112
gamma radiation effects on H_2-N_2 mixture 11
infrared spectra and structure 57
methane removal from synthesis gas 45

nitrate, decomposition and heating rate 11
synthetic anhydrous, Lake Charles (La.) plant 72

ANALYTICAL INSTRUMENTS. See also Chromatography; Mass Spectrometer; Spectography; X-ray methods
automatic chromatographic analysis on fractionator 344
automatic, 1956-8, review 127
calorimeters, recording, operating characteristics 230
capillary tube viscometer, high-pressure 127
nuclear magnetic resonance for hydrocarbon structure 19
polarography for O_2 and SO_2 19
potentiometer, calibration 383
product control, initial and end point analyzers 344
radiation detector, plastic-phosphor scintillation-type for liquid and gaseous effluents 379
radio-chemical processes, instrument control 19
recording thermobalance 345
Reid vapor pressure control by analyzer 274
selection, for improved process 234
selection, process control 234
spectrophometers, new commercial 88
stream analyzers for ethylene cost reduction 23
Titrilog, improved, electronic filter and steady zero requirements 88
Titrilog sensitivity, improved for air pollutants 88

APPLIANCES. See also Air Conditioning; Burners; Cookers; Dryers; Heaters; Incinerators; Pilot Lights; Refrigerators
air conditioners, sales recovery 215
automatic ignition and control 118
gas-fired unit, production plans 354
infrared vertical broiler 355
product directory, 1959 3
sales increase, 1959, ten per cent 354
standards, safe installation and operation, 24-company survey 318

AROMATICS
naphthalene, refined from tar fractions 112
plant overcapacity, review 100
sulfur removal by hydrorefining 43

AUTOMATION. See also Compressor Stations; Telemetering
absorber, control by infrared analyzer 204
amine regeneration plant, continuous operation 363
central system control 190
central vs local techniques 364
coal handling, application 303
code system 33
complete control, development 151
computer application, systems engineering 283
computer control, petroleum refinery 83
computer control, planning for pipelines 327
computer control, process 83
computer control, products 341
control system for constant cooling rates 405
data handling, integrated systems 151
design factors, dispatching system 204
fire protection, compressors 222

high-temperature powder-diffraction 57
K-capture method, for plant stream analysis 90

Services Available to GAS ABSTRACTS Readers

Photocopies

Photocopies of all articles abstracted in *Gas Abstracts,* except those enumerated here, are available from the Institute at cost:*

1) Russian Articles.—Abstracts are obtained from services specializing in this field. English translations can be supplied by arrangement with the appropriate abstractor.
2) U.S. Patents.—Printed copies can be secured at 25 cents each (remittance with order) from the Commissioner of Patents, Washington 25, D.C.
3) Books, Special Reports.—When a price is given in the abstract, these should be secured from a bookdealer or the publisher; when stated *free,* from the publisher.

Types of Photocopies

Depending on the "tightness" of the binding (which determines whether pages can be laid flat without breaking the binding), and the color of the paper and ink used in the original being copied, photocopies may take any of several forms:

1. Positive paper prints made by the reflex process.
2. Positive paper prints enlarged by xerography from microfilm negatives.
3. Negative photostats.
4. Positive photostats.

Choice of the method used must necessarily rest with the Institute. All photocopies are approximately the same size as the original material.

Cost of Service

The photocopy service charge is:

First 5 pages or fraction thereof of one article in one issue $1.50

Each subsequent 4 pages or fraction thereof of the above one article in the same issue.....$1.00

Invoices are rendered to the Institute's Members and Contributors only; payment in advance is required of others.

The Institute may, at its option, fill orders from non-Members and non-Contributors without payment in advance, but an additional charge of $1.00 to cover billing costs will be made on each such order.

Microfilm

Microfilm copies of articles abstracted in *Gas Abstracts* are likewise available at cost.* The material is photographed on 35 mm unperforated negative film at 5¢ per page, with a minimum of 50 pages, $2.50, per order. Invoices are rendered to the Institute's Members and Contributors only; payment in advance is required of others.

The Institute may, at its option, fill orders from non-Members and non-Contributors without payment in advance, but an additional charge of $1.00 to cover billing costs will be made on each such order.

Bibliographies and Literature Searches

The library will prepare bibliographies and make literature searches on a cost basis plus a service charge. A comprehensive statement detailing the problem must be presented with the request.

Gas Abstracts on Cards

The abstracts in each monthly issue are also printed individually on 5 x 8-inch cards. Each card bears at its top the author and subject headings under which it may be filed. As many copies of each card are supplied as there are headings on that card, enabling filing of the abstract under all of its headings, eliminating cross-indexing.

The annual subscription to *Gas Abstracts on Cards,* a mailing of 500-1000 cards each month, is $120.00 to U. S. addresses, $150.00 foreign.

Since the printing order for cards is based on the current number of subscribers, a subscription for this service commences with the month in which the order is received. Back numbers of *Gas Abstracts on Cards* are not available.

Back Numbers of Gas Abstracts

In response to an increasing number of requests from utilities, colleges, and technical libraries which have only recently learned of the reference value of *Gas Abstracts,* the Institute has taken steps to make available single numbers, volumes, or complete files of this publication to date, starting with Vols. 1 (1945) and 2 (1946), some numbers of which are out of print.

The latter numbers are reproduced by a photoprinting process from copies in the Institute's libraries, and Vols. 1 and 2 can now be purchased at $35 per volume, unbound; single monthly numbers are offered at $3 each.

Vols. 3 to date are available at current subscription prices, $18 per volume to U. S. addresses, $22 foreign. Monthly numbers are $2 each.

***In requesting and accepting photocopies or microfilm copies, the applicant agrees to the following:**

1. The applicant desires this duplication solely for use in lieu of loan or manual transcription. Responsibility for questions of copyright that might arise in this copying, and in the use of the copies, is assumed by the applicant.

2. The applicant understands that the Institute does not sell the photocopies, but merely performs the service of copying at the applicant's request; the fee paid is exclusively for such service and is established on the basis of no profit to the Institute.

3. The Institute reserves the right at its own discretion to decline to make photocopies requested, or to limit the number of copies, within the principle of fair use of copyrighted material.
